

Be Green, Save Green

EXPO

Learn about:

Modern Energy and Renewable Technologies

Wednesday, April 6, 2011; 2:00-6:00 p.m.

Egan facility in Brooklyn Park

You'll discover how to:

- Reduce utility costs & operational expenses
- Improve productivity & efficiency of systems
- Upgrade an aging infrastructure without breaking the bank
- Find a whole new source of energy right in your own building
- Harness the sun without shooting for the moon
- Hitch your dreams to an EnergyStar Program
- Navigate the road ahead for Electric Vehicle Charging and your building
- Streamline process & manufacturing systems

Meet with national equipment manufacturers, Egan energy specialists, utility reps, and production improvement professionals covering:

Solar ♦ Geo-thermal ♦ LED Lighting

The Latest in High Efficiency HVAC Equipment

Electric Vehicle Charging Stations ♦ Building Automation Systems

Join other building owners, property managers, facility directors, maintenance managers, company CFOs and others concerned with improving their building's efficiency, saving money and doing what's right through...

"Sustainable Solutions on a Sensible Budget"
